ELSEVIER

Comput. Methods Appl. Mech. Engrg. 143 (1997) 427–428

Computer methods in applied mechanics and engineering

Contents Volume 143

Volume 143, Nos. 1–2, 15 April 1997

A new finite element with 'drilling' D.O.F.
C. Chinosi, M.I. Comodi and G. Sacchi 1

High-order boundary conditions and finite elements for infinite domains
D. Givoli, I. Patlashenko and J.B. Keller 13

The quadrilateral 'Mini' finite element for the Stokes problem
W. Bai 41

A finite element formulation for incompressible flow problems using a generalized streamline operator
M.A. Cruchaga and E. Oñate 49

An exact model reduction procedure for mechanical systems
S.L. Chen and M. Géradin 69

Numerical analysis of the modified EVSS method
M. Fortin, R. Guénette and R. Pierre 79

A domain decomposition approach for heterogeneous time-harmonic Maxwell equations
A. Alonso and A. Valli 97

Moving least-square reproducing kernel methods (I) Methodology and convergence
W.-K. Liu, S. Li and T. Belytschko 113

Nonlinear analysis of laminates through a mindlin-type shear deformable shallow shell element
A. Barut, E. Madenci and A. Tessler 155

Shape-memory alloys: modelling and numerical simulations of the finite-strain superelastic behavior
F. Auricchio and R.L. Taylor 175

Call for papers 195

Volume 143, Nos. 3–4, 30 April 1997

On the constitutive modeling and finite element computation of rate-dependent frictional sliding in large deformations
T.A. Laursen and V.G. Oancea 197

A method for contact problems using virtual elements
W.R.C. Underhill, M.A. Dokainish and G.Æ. Oravas 229

Evolution of plastic anisotropy for high-strain-rate computations
S.K. Schiferl and P.J. Maudlin 249

On discrete projection methods for the incompressible Navier–Stokes equations: an algorithmical approach
S. Turek 271

Linearizing convection terms in the Navier–Stokes equations
B.M. DeBlois 289

C^1-Continuous stress recovery in finite element analysis
H.R. Riggs, A. Tessler and H. Chu 299

Equal-order interpolations: a unified approach to stabilize the incompressible and advective effects
M. Storti, N. Nigro and S. Idelsohn 317

A fractional four-step finite element formulation of the unsteady incompressible Navier–Stokes equations using SUPG and linear equal-order element methods
H.G. Choi, H. Choi and J.Y. Yoo 333

A monotone finite element method with test space of Legendre polynomials
T.W.H. Sheu, S.F. Tsai and M.M.T. Wang 349

A finite element formulation for the Stokes problem allowing equal velocity–pressure interpolation
R. Codina and J. Blasco 373

Energy preserving/decaying schemes for non-linear beam dynamics using the helicoidal approximation
C.L. Bottasso and M. Borri 393
